Performance Test

Date	20 October 2026
Team ID	Roll 58
Project Name	EV Market Analysis Dashboard using Tableau Public
Maximum Marks	5 marks

Project Performance Testing:

The project team shall fill the following information in the Project performance testing template.

S.No.	Parameter	Screenshot / Values
1.	Data Rendered	Dataset contains 200,000 records and 37 columns in the previously inspected version. Verify the loaded table's record count and storage size in the target environment.
2.	Data Preprocessing & Quality	Test NULL values, exact duplicates, blank text fields, inconsistent category labels, invalid numerical values, and data type conversions. Record actual query outputs
3.	New Fields Created	Planned derived fields: `PRICE_USD_PER_KM_RANGE`, `RANGE_BAND`, `PRICE_BAND`, and `DATA_QUALITY_STATUS`. Confirm which fields have actually been created.
4.	Filter Efficiency Test	Test Manufacturer, Category, Battery Type, Market Region, Manufacturing Country, and Model Year filters. Record execution time and returned records for each test.
5.	Dashboard & Visualization Testing	Planned visualizations cover manufacturer sales, category sales, battery distribution, range and efficiency, price versus range, charging performance, customer ratings, geography and model year, and sustainability. Total 8 are done.
6	Query History	Identify the query with the highest execution time, its duration, execution status, rows returned, and bytes scanned using Snowflake query history. Record the actual results.
