Project Performance Testing:

Project team shall fill the following information in model performance testing template.

S.No.	Parameter	Screenshot / Values
1.	Data Rendered	Dataset contains **200,000 records and 37 columns** in the inspected version. Verify successful data loading in Tableau Public. Attach a screenshot of the data source page showing the dataset and field names. Record the actual loading time if measured.
2.	Data Preprocessing	Check missing values, duplicate records, blank fields, inconsistent manufacturer/category names, incorrect data types, and invalid numerical values. Standardize text fields and verify data quality before creating visualizations. Attach screenshots of the data source and data-quality checks.
3.	Utilization of Filters	Use interactive filters for **Manufacturer, Category, Battery Type, Manufacturing Country, Market Region, Model Year, and Recommended Use Case**. Test whether the charts update correctly when filters are selected. Attach screenshots showing selected filters and the updated dashboard.
4.	Calculation fields Used	Suggested calculated fields: Price per KM of Range, Range Band, Price Band, Average Range, Average Price, and Total Recorded Sales. Verify each calculation against the source data before using it in charts. Attach a screenshot of Tableau's calculated-field editor and the resulting values.

5.	Dashboard design	Use interactive filters for **Manufacturer, Category, Battery Type, Manufacturing Country, Market Region, Model Year, and Recommended Use Case**. Test whether the charts update correctly when filters are selected. Attach screenshots showing selected filters and the updated dashboard.
6	Story Design	**Proposed: 4 story points** — (1) EV Market Overview, (2) Manufacturer and Category Sales, (3) Battery, Range and Price Analysis, and (4) Customer Ratings and Sustainability Insights. Record the actual number of story points created and attach a screenshot of the Tableau Story interface. -
