DEMONSTRATION OF PROPOSED FEATURES

EV Market Analysis Dashboard using Tableau Public

Date	20 October 2026	**Team ID**	Roll 58
Project Name	EV Market Analysis Dashboard using Tableau Public	**Maximum Marks**	1 Mark

Purpose: This document records the features proposed for the EV dashboard and provides a place to track implementation and demonstration evidence. The status values below are conservative placeholders and should be updated to match the actual Tableau workbook.

Demonstration of Proposed Features

S.No.	Feature Name	Description	Status (Implemented / Partial / Pending)	Demonstrated (Yes / No)	Remarks
1	**EV Market Overview & KPI Cards**	Present high-level metrics such as total recorded annual sales, average driving range, average price, and average customer rating. Use fields such as annual_sales_units, range_km, price_usd, and customer_rating.	Pending	No	Proposed feature. Verify KPI calculations and add a screenshot of the completed overview.
2	**Manufacturer Sales Comparison**	Compare recorded annual sales by manufacturer using a sorted bar chart based on manufacturer and annual_sales_units.	Pending	No	Confirm the sales aggregation and ordering; attach the chart screenshot when available.
3	**Vehicle Category Analysis**	Compare recorded sales across vehicle categories and show category differences using clear labels and totals.	Pending	No	Use category and annual_sales_units; validate totals against the source dataset.
4	**Battery, Range & Efficiency Analysis**	Explore battery types, battery capacity, driving range, and energy efficiency using charts and tooltips.	Pending	No	Relevant fields include battery_type, battery_capacity_kwh, range_km, and efficiency_wh_per_km.
5	**Price, Charging & Ratings Analysis**	Support comparisons of price versus range, charging performance, and customer/safety ratings.	Pending	No	Relevant fields include price_usd, range_km, max_dc_charging_kw, charging time fields, customer_rating, and safety_rating_stars.
6	**Interactive Filters & Geographic / Year Insights**	Allow exploration by manufacturer, category, battery type, manufacturing country, market region, model year, and recommended use case.	Pending	No	Test that selections update relevant views. Include geography, model-year, and sustainability views only if implemented.

Feature Implementation Summary

Total Features Proposed	6
Total Features Implemented	To be confirmed from the completed workbook
Total Features Demonstrated	To be confirmed from screenshots / demo
Overall Implementation Rate (%)	(Implemented features ÷ 6) × 100
